PEROT

**T**HE XXII<sup>th</sup> INTERNATIONAL Orthopaedic Surgery and Traumatology Course will be held on October 17-18-19 2008.

The practical sessions as well as the surgical interventions will take place on the Friday and Saturday mornings at the clinic, theoretical points will be dealt within the hotel Best Western Golf du Gouverneur environment in the course of the afternoons and on the Sunday morning, a shuttle bus will provide transportation.

Handing down experience, or the outcome of acquired knowledge and instilling the desire and the determination to undertake, there lies the essential spirit subtending the training courses.

For attending beginners we propose that they deal with surgical indications in a simple and pragmatic manner, that they acquire the gestures which lead to advancement, that they use the appropriate equipment or even that they learn to temper the level of anxiety which goes with problem solving. To those who have already gained considerable experience, we aim to offer an approach which may differ relative to their daily practice, but will be a source of discussion and overtone.

A very professional form of real time interpreting will make it easy to understand the proceedings.

Anatomy is a common denominator among surgeons. Our thanks go to Professor BARONE for chairing these sessions. Also Professor HERRON and to all the experienced surgeons who animate this course and who will be as available as I myself will be.

We also owe thanks to the laboratories who will be present on site, for having understood the need for this type of open training, which supports common progress.

What we hope is that the reward for your efforts will come from your patients and from their owners/masters and that you will spend three days of intensive work, but also of fruitful friendly discussions in the heart of the « Dombes » region with all its innumerable ponds.

To all of you our best wishes, and welcome to the course!

François PÉROT

# PROGRAM

(Some modifications may occur without any notice)

## THURSDAY OCTOBER 16<sup>TH</sup>

Participants arrival – Free evening

## FRIDAY OCTOBER 17<sup>TH</sup>

### Morning

8.00 am Opening of the course  
Attache cases delivery

8.30-12.30 am Surgery
